TRAINING ON THE SAFE USE AND HANDLING OF PESTICIDES

In January 2025, a comprehensive training session on the safe use and handling of pesticides was conducted for 18 team members. The training, delivered by an internal instructor, covered key safety measures for the storage, transportation, mixing, and application of pesticides. Emphasis was placed on the proper use of personal protective equipment (PPE), along with essential knowledge on first aid procedures for chemical-related emergencies. This initiative reinforces the organization's commitment to a safe work environment and compliance with safety regulations and responsible chemical management practices.

VIRTUAL TRAINING ON THE CODE OF ETHICS FOR SUPPLIERS

On January 31, Grupo Agrolibano conducted a virtual training session on its Code of Ethics for 66 national suppliers, led by our sustainability director Pamela Molina. The objective was to reinforce the ethical guidelines that ensure transparency and compliance with standards in commercial operations.

The training covered fundamental principles of the code, behavioral standards, transparency and anti-corruption policies, reporting procedures through the Ombudsperson, and practical case studies. Participants engaged in discussions, asked questions, and completed a satisfaction survey to evaluate the session and provide feedback.

2 RURAL SAVINGS AND CREDIT BANKS EVALUATE THEIR PERFORMANCE 2024

In January 2025, the Agrolibano Foundation, along with the Center for Business Development for Micro, Small, and Medium Enterprises (CDE MIPYME) of the Gulf of Fonseca, began evaluating the performance of 12 rural savings and credit banks. This analysis includes aspects such as internal organization, administrative management, sustainability, and finances at the close of 2024.

The savings banks presented documentation on their progress and strategic achievements, highlighting their impact on the local economy by offering accessible financial services to communities excluded from the traditional banking system. This effort supports the Sustainable Development Goals (SDGs) 1, 5, 8, 10, 16, and 17.

FORMATION OF THE COMMUNITY HEALTH COMMITTEE IN CHILAMATADA

In January 2025, the Chilamatada community formed its Community Health Committee after updating the child census for children under 6 years old through home visits to 100% of households. This committee will strengthen nutritional monitoring in the community.

New volunteers joined the team and, with the support of the Healthy Families program, began their training on topics such as safe motherhood, healthy housing, nutritional monitoring, and promoting a culture of peace. This achievement supports the Sustainable Development Goals (SDGs) #2, 3, 4, and 17, reaffirming the Agrolibano Foundation's commitment to community health and quality of life.

SUPPORT FOR 96 FAMILIES TO IMPROVE THEIR AGRICULTURAL PRODUCTION

In January 2025, the Healthy Families Program supported 96 families to strengthen food security and family production. Material to optimize irrigation systems was provided to 16 families who grow beans, squash, and corn in plots near the river, increasing crop yields and household income. Additionally, 80 families received seeds, tools, and materials to establish and strengthen family gardens with crops such as cucumbers, sweet peppers, and beans, promoting a varied and healthy diet.

This effort promotes food sustainability, improves family economies, and contributes to the integral development of communities, supporting the achievement of the Sustainable Development Goals (SDGs) #2, 3, 12, and 17.

PROMOTING SAFE AND HEALTHY MOTHERHOOD PRACTICES

In January 2025, educational talks on safe motherhood were initiated in coordination with the health committees of San Agustín and Tamarindo Nacaome, as well as the health personnel from the CIS of San Jerónimo in Namasigüe, Bertín Umanzor, and the UASP Tular in Nacaome. In these sessions, 27 women participated in topics about the benefits of family planning, and 28 women attended talks on the importance of intrauterine stimulation.

These activities, carried out at both the community and institutional levels, strengthen maternal and child health through a preventive and educational approach, promoting family quality of life and contributing to the achievement of the Sustainable Development Goals (SDGs) #2, 3, and 17.
